CAREER OBJECTIVE

Motivated and passionate Computer Science & Engineering undergraduate with solid fundamentals in software engineering, data structures, and modern web applications. Seeking an opportunity to leverage analytical problem-solving and software development skills to create impactful, scalable solutions while driving organizational innovation.

EDUCATION

Degree / Certificate	Institution / Board	Score	Year
B.Tech in Computer Science & Engineering	Ganga Institute of Technology and Management (MDU Rohtak)	8.09 CGPA	2024 – Present
Intermediate (Class XII)	Senior Secondary Board Education	63.6%	Completed
Matriculation (Class X)	Secondary School Examination	66.6%	Completed

TECHNICAL SKILLS

Languages:	Python, C++, JavaScript (ES6+), SQL
Web Technologies:	HTML5, CSS3, React.js, Responsive Design, RESTful APIs
Data & Machine Learning:	Pandas, NumPy, Scikit-Learn, Streamlit, Data Wrangling & EDA
Database & Developer Tools:	MySQL, Relational Databases (RDBMS), Git, GitHub, VS Code
Core Engineering:	Data Structures & Algorithms (DSA), OOPs, Operating Systems, DBMS

PROJECTS

- Digital Clock Application** *JavaScript, DOM Manipulation, CSS3*
 - Designed and developed a responsive digital clock showing real-time hours, minutes, seconds, and dates.
 - Implemented dynamic DOM updates via JavaScript interval handlers with smooth transitions and theme styling.
- ML Salary Prediction Web App** *Python, Scikit-Learn, Pandas, Streamlit*
 - Trained a supervised linear regression machine learning model to estimate salaries based on industry experience.
 - Developed an interactive Streamlit UI and published it via Streamlit Cloud integrated with GitHub version control.
- Data Analysis & Manipulation with Pandas** *Python, Pandas, NumPy, Data Analysis*
 - Executed complete Exploratory Data Analysis (EDA) pipelines involving data cleaning, missing value imputation, and filtering.
 - Computed aggregated statistical summaries and multi-dimensional grouping to extract key data insights.
- Live Interactive World Map** *Leaflet.js, OpenStreetMap API, JavaScript*
 - Engineered an interactive mapping application featuring real-time client-side geolocation pinpointing and area searches.
 - Integrated customized pin markers, interactive tooltips, and dynamic zoom rendering across desktop and mobile screens.
- Jarvis – Voice Activated Desktop Assistant** *Python, SpeechRecognition, Pytsx3*
 - Built an automated desktop voice assistant processing speech commands to automate routine computer workflows hands-free.
 - Programmed custom intent recognition to trigger web searches, launch system software, and query Wikipedia.

KEY STRENGTHS

- Strong logical thinking & analytical problem solving
- Effective technical communication & presentation
- Fast learner & adaptable to modern frameworks
- Team collaboration & disciplined version control
